ALPINE CANADA ALPIN

SKIER'S NAME:

MID-SEASON DATE:

TEAM:

END SEASON DATE:

LEVEL 1

THE CONTROLLED SKIER

SKILL LEVEL ATTRIBUTES:

- SAFETY
- CONTROL
- EXPERIMENTATION OF VERTICAL MOVEMENT
- INTRO TO MOUNTAIN AWARENESS
- PSYCHOLOGICAL SKILLS
- INTRO TO COMPETITIVE SPIRIT

KEY FOCUS:

Suppleness + Speed

COUNTS TOWARDS EVALUATION

COUNTS TOWARDS EVALUATION	MID SEASON PROGRESS			END OF SEASON EVALUATION		
	B	S	G	B	S	G
DEMONSTRATE TECHNICAL SKILLS						
Rocking forward and back traverse.						
25 turns around obstacles lifting the inside ski.						
Ski under 25 obstacles using all joints.						
Ski down a green run under control, using natural balance.						
DEMONSTRATE DECISION/REACTION SKILLS						
Stop on coach's command using visual and audible cues.						
Skier has choice of stopping styles.						
Athlete is involved in decision making.						
DEMONSTRATE GATE SKILLS						
Green terrain: 4m VD flush, minimum 25 turns in brushes.						
Green terrain: 4m VD x 1m OS x minimum 25 turns in brushes.						

B BRONZE = ACQUISITION OF SKILLS

- Can perform tasks at own pace in a stable, predictable, distraction free environment.
- Coach can see that task is being executed in its general form, major improvement needed
- Can repeat the task often with moderate precision

S SILVER = CONSOLIDATION OF SKILLS

- Correct execution in variable conditions
- Speed is increased moderately
- Movements are getting more precise and consistent

G GOLD = REFINEMENT OF SKILLS

- Minor improvement needed
- High degree of precision and consistency in movements
- Can perform skill at fast speed without fault

SKILLS AND KNOWLEDGE ACQUIRED FOR THIS LEVEL

<p>PSYCHOLOGICAL SKILLS Imagery, Visualisation, Relaxation (Ex. Floating on a cloud / Spaghetti toes / Jelly belly)</p>	<p>CANADIAN SKI HERO Name 3 facts about a national team racer (equipment, best results, which club are they from, etc.)</p>		
<p>RACING SKILLS 30m straight line one ski duals; both feet. Start and finish line skills.</p>	<p>ATHLETIC SKILLS On the spot ankle rebound jumps. Boots unbuckled and buckled. Ankle rebound jumps in motion. Green terrain. Boots unbuckled and buckled.</p>		
<p>PHYSICAL CAPACITIES Balance drills: single leg, eyes closed. 5 seconds explosive agility drill. Fast feet. Work on the splits; both directions.</p>	<p>ANCILLARY KNOWLEDGE Name 3 points from the skier's responsibility code. Up and down all around warm-up.</p>		
<p>ENVIRONMENT Knowledge of riding lifts. Able to ski kids tree trails. Snowplow turns in bumps.</p>	<p>PARA SKILLS All the skills listed above can easily be adapted to para-skiers if required. Many of the drills and skills are transferable to para-skiers with little to no modification (for instance all pole plant drills can be done with outriggers), while others may require some adjustments (one-leg drills will not apply to sit skiers). The key is to adapt the drill specific to the needs and ability of the individual you're working with. You will find as you work with the skier, you will develop a good understanding of what they are physically capable of. Modifications may need to be made based on physical capacities, but while still teaching the same technical skill.</p>
